Course Works Update

The inclement weather put a hold on a couple plans regarding the course excavation works.

This week, weather permitting, we will continue excavating the west end of the third creek as it approaches the bridge. A temporary access bridge/mound will be in place prior to the excavation required to join the two water bodies.

This is a delicate part of the operation as the main irrigation pipe runs underneath the bridge. Pipes will be laid to enable flow between the third creek and fourth dam. These pipes will have soil placed back over them, will be compacted, topped in crushed rock and have pavers installed.
